CAREER OBJECTIVE

To obtain a position where I can apply my knowledge and skills in software development, Virtual Reality (VR), multimedia production, and information technology while contributing to organizational growth and innovation. To utilize my experience in system development, project coordination, technical support, and creative collaboration gained through academic, freelance, and organizational involvement, while continuously improving my professional, technical, and leadership abilities in a dynamic working environment.

DESIGN PROJECTS COMPLETED/ RESEARCHES

Defiapes

Defiapes is a cryptocurrency project that is built on three categories: Contract Deployer, Coin Developer, and Influencer, all of which are legitimate. It has a star rating and comments that people may rate to let others know it is legitimate.

Infinite Beauty Raquel-Washington, DC

Developed and maintained infinitebeautyraquel.com, an e-commerce website focused on beauty products. Responsible for front-end and back-end development, ensuring a seamless user experience, mobile responsiveness, and secure payment integration. Optimized site performance, implemented UI/ UX enhancements, and managed updates to improve functionality and customer engagement.

Merak Wellness Center-Washington, DC

Merak Wellness Center is a holistic health and wellness center dedicated to promoting mental, emotional, and physical well-being. Offering a range of services including therapy, counseling, and alternative healing treatments, Merak focuses on personalized care to help individuals achieve balance and selfimprovement. Their mission is to create a supportive environment where clients can heal, grow, and thrive.

Lavish Rejuvenations-Washington, DC

Lavish Rejuvenations is a premier wellness and aesthetics center specializing in advanced skincare, beauty treatments, and rejuvenation services. Offering a range of non-invasive cosmetic procedures, including facials, body contouring, and anti-aging solutions, Lavish Rejuvenations is dedicated to enhancing natural beauty and promoting overall well-being. Their expert team provides personalized treatments to help clients look and feel their best.

Maternal Fetal Specialist-Washington, DC

Maternal Fetal Specialists is a private practice in Fredericksburg and Springfield, Virginia, led by board-certified maternal fetal medicine specialist Dr. Pushpinder Dhillon. The practice offers comprehensive care for both low-risk and high-risk pregnancies, including advanced fetal ultrasounds, fetal echocardiograms, prenatal testing, and preconception counseling. They also provide diabetic management for women with Type 1, Type 2, or gestational diabetes. Accredited by the American College of Radiology, the facility utilizes state-of-the-art equipment and board-certified providers to ensure high-quality care without additional facility fees typically associated with hospital-based practices.

Automated Borrower's Equipment Application

This system, developed using PHP, aims to enhance and automate the equipment borrowing process for items such as projectors, console cables, and other computer peripherals. The system includes a data entry form for recording essential borrower and borrowed item details, as well as a database for storing information and generating reports. It also features an inventory management module to monitor available units and remaining stock for borrowing. Additionally, the system incorporates an email notification feature to alert borrowers regarding overdue items, along with a configurable module that defines the number of days before an item is considered overdue. Furthermore, the system provides a printout generation feature for creating borrower slips based on the borrowed equipment.

Pottery Immersive Atelier (PIA): Immersive Pottery Educational Game Applying 3D Mesh Modeling Algorithm

Pottery Immersive Atelier is a Virtual Reality-based pottery training and educational system developed to provide users with an immersive

and interactive pottery-making experience. The project simulates the complete pottery workflow, including clay carving, painting, kiln processing, and final product evaluation within a virtual environment. It features tutorial and quest modes, grading and feedback systems, interactive VR mechanics, and guided learning tools designed to promote pottery education and cultural appreciation through modern technology. The system was successfully completed and defended as a capstone project in partnership with Tahanan Pottery & Studio.

ON-THE-JOB TRAINING/ PRACTICUM/ INTERNSHIP EXPERIENCES

- Web Developer
